Chernobyl Children's Project (UK), Solihull Group – 2019

Over the last 20 years CCP Solihull Group has provided 4 week recuperative holidays for almost 400 Belarussian children. Contamination from the Chernobyl disaster continues to cause cancers and serious health conditions. Each summer we invite 12 teenagers (6 boys & 6 girls) aged 13-15, all are in remission from cancer, they are accompanied by a doctor and interpreters.

The children stay in pairs with local volunteer host families for the first 2 weeks, then move to a residential school for a further 2 weeks. The holiday boosts their damaged immune systems and improves their health, happiness and confidence. During the four weeks they enjoy some fantastic trips and activities, and make lasting friendships and memories to treasure.

If you could help to provide a holiday of a lifetime please contact us or see our 'WISH LIST'.
